

Firefox

Install

```
sudo apt-get install firefox
```

Settings

Iniziare a visualizzare youtube prima e seconda linguetta

```
about:config
```

```
media.block-autoplay-until-in-foreground = false
```

```
media.autoplay.enabled.user-gestures-needed = false
```

Altro

```
layers.acceleration.force-enabled
```

```
layers.offmainthreadcomposition.enabled
```

Modificare FIREFOX x rete TOR

See: [TOR](#)

In Preferences > Advanced > Network tab > Settings manually set Firefox to use the SOCKS proxy localhost with port 9050.

Then you must change:

```
about:config
```

```
network.proxy.socks_remote_dns = true
```

and restart the browser.

This channels all DNS requests through TOR's socks proxy.

servidor socks: 127.0.0.1 port 9050
